# Labor Market Information

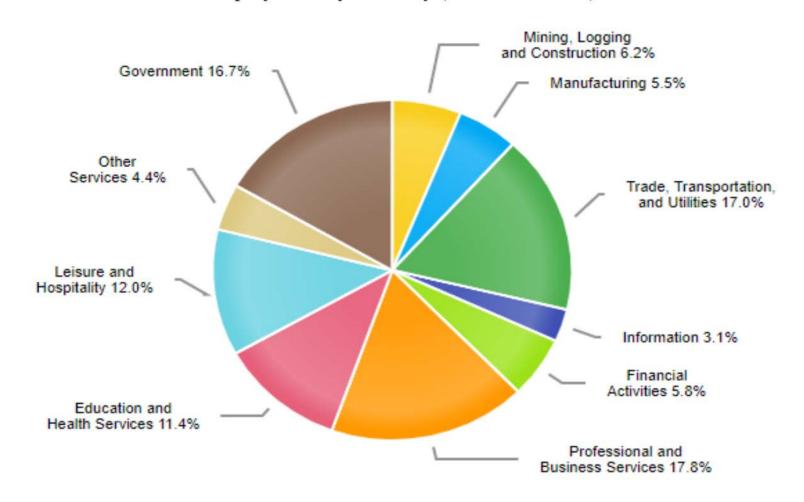

Labor market (job market) information tells you about the current work and job environments in specific regions.

It includes information about specific companies, industries and occupations.

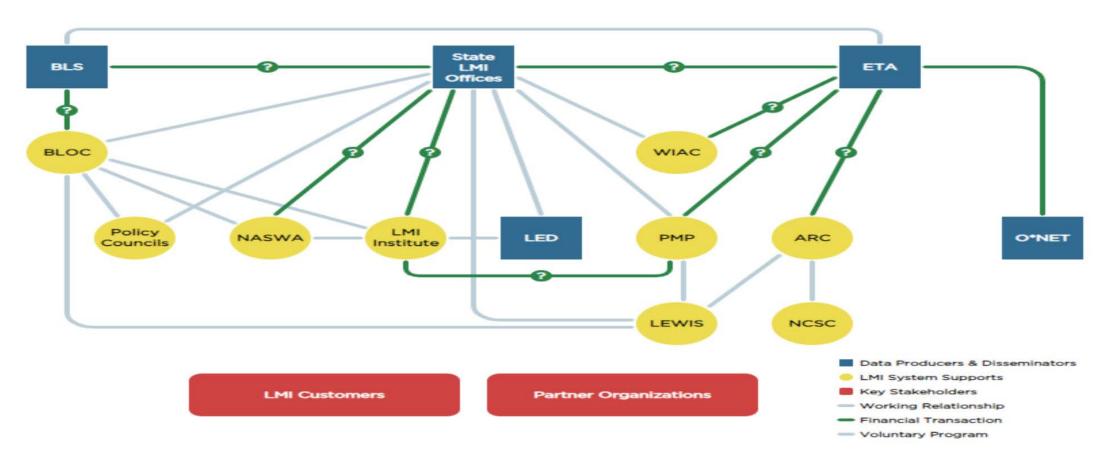

#### **Labor Force Statistics**

#### **Employment by Industry (November 2019)**

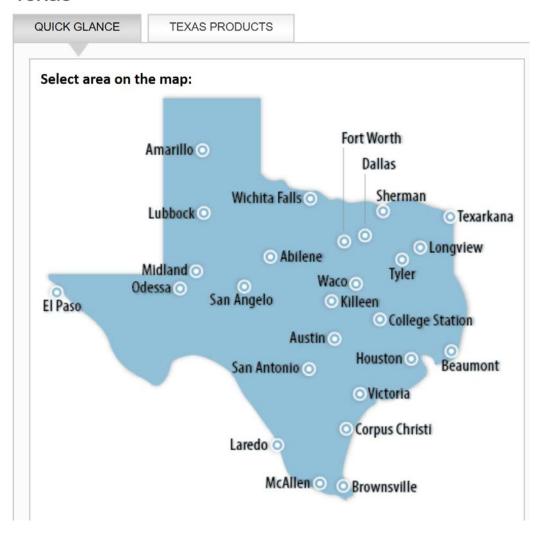

#### Federal-State Labor Market Information (LMI) Infrastructure

USING LABOR
MARKET DATA TO
IMPROVE STUDENT
SUCCESS

Aligning Talent and Opportunity

AN EMPLOYER GUIDE TO EFFECTIVE COMMUNITY COLLEGE PARTNERSHIP

#### The Workforce Playbook

A COMMUNITY COLLEGE GUIDE TO DELIVERING EXCELLENT CAREER AND TECHNICAL EDUCATION

#### LMI can be used to:

- **Decide** which college programs to offer and how many graduates a college should aim to produce to fill available jobs related to the program.
- **Assess** program effectiveness, signaling whether a college's programs provide the necessary skills, both in terms of specific competencies and appropriate rigor, for students to succeed after they graduate.
- **Help** students make informed choices about which programs to enter, both by accelerating student decision-making and thereby increase chances for graduation and by enhancing the likelihood they will choose a degree aligned to a well-paid, available job.
- Advocate for the college by using data on graduates' employment outcomes to demonstrate to the state and others that investments in the college are worth while, and will go beyond broadening access to delivering graduates able to contribute to their families, communities, and states.

#### LMI can be used to:

- Developing programs tailored to specific job opportunities
  - TWC focus High Wage, High Demand,
- Right size existing programs
- Improving program quality
- Closing programs with low returns
- Helping undecided students Choose
- Outreach To potential students
- Advocating For The value of Community Colleges

### LMI-LMA and Equity

• .....help higher education institutions respond to the needs of students and employers within the boundaries of their own educational missions.

 .....help students balance financial and other life goals after graduation.

 .....examining which state expenditures will most likely enable students to graduate with the skills needed to fill jobs that will help states' economies grow.

### Skills "GAP"

*skills gap* is present when the training or education for a given occupation does not adequately prepare students for the demands of that occupation

skills shortage is more commonly what we're really talking about—this is when training for a given occupation is adequate, but there just aren't enough people getting that training and then entering that occupation.

*skills mismatch* is when, on a broader level, the supply and demand of skills—usually measured by education level—are out of sync.

# "Skills Gap" = Underemployment

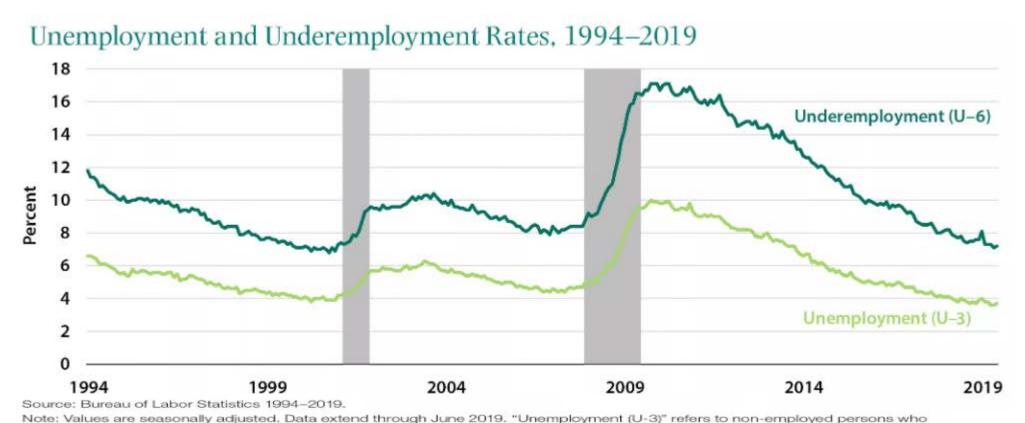

#### Common types of underemployed workers include these:

- Skilled workers in low-paying jobs.
- Skilled workers in low-skill jobs.
- Part-time workers preferring full-time hours.
- Unemployed workers currently looking for work.

## "Skills Gap" = Underemployment

- There are two primary types of underemployment.
  - Visible underemployment
    - is underemployment in which an individual works fewer hours than is necessary for a full-time job in his or her chosen field. Due to the reduced hours, they work two or more part-time jobs in order to make ends meet.
  - invisible underemployment.
    - It refers to the employment situation in which an individual is unable to find a job in his or her chosen field. Consequently, they work in a job that is not commensurate with their skill set and, in most cases, pays much below their industry standards.
  - Third type of "underemployment"
    - unable to find work in their chosen field, quit the workforce altogether....

# "Skills Gap" = Underemployment

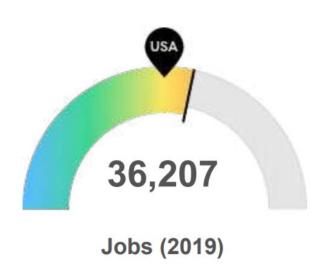

are available for work and have searched for a job in the previous month. "Underemployment (U-6)" includes the unemployed, people working part-time for economic reasons, and the marginally attached, defined by the Bureau of Labor Statistics as "those who currently are neither working nor looking for work but indicate that they want and are available for a job and have looked for work sometime in the past 12 months."

#### Automation Index

### Automation Index

 $\underline{\text{https://www.mck}} \underline{\text{https://www.mck}} \underline{\text{https://www.mck}$ 

- Retirement index is based on the Census, BLS, and ACS.
  - The percentage of workers who are currently in the occupations being studied.

Why would this matter?

What does this mean to academic planning?

SOC	Description	% 55+
11-3021	Computer and Information Systems Managers	14%
15-1122	Information Security Analysts	12%
